Environmental Surveys

The UK's Leading Commercial Fuelling Solution Specialists

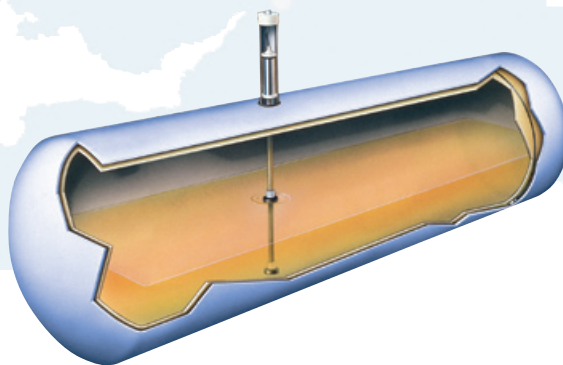

Cameron Forecourt is the leading UK provider of total solutions and technologies providing convenience, control and environmental integrity for all equipment used in conjunction with commercial vehicle fuelling installations.

Please call us now on 01226 742 441 to discuss your requirements

Our UK operations provide nationwide support to our many customers via our regionally based and directly employed service and installation engineers. Electronic call logging and customer based web access are just some of the tools we use to track our performance and monitor our customers current site status.

We are proud to include within our prestigious customer list The Royal Mail, Stagecoach, Biffa, Eddie Stobart, DHL, Ford Motor Company, Group 4 Cash Services, Gist, Carillion, Emergency Services, plus many local & county authorities.

Cameron Forecourt offers a unique "One Stop Shop" service for ALL of your commercial fuelling solutions embracing planning and project management, supply and installation of equipment, ongoing service and maintenance support via comprehensive service contracts or ad-hoc repairs and environmental surveys to ensure compliance with current legislation.

Above & Below Ground Fuel Tanks

Cameron Forecourt can supply a wide range of PPG2 compliant tanks ranging from 200 Litres to 200,000 Litres capacity. Options are available to suit every type of application from transportation, engine test cell fuel supplies, train, bus, generator and marine refuelling facilities.

High Accuracy Tank Gauging & Environmental Monitoring Systems

Minimising exposure to the risk of environmental pollution, whilst optimising inventory control are just two of the benefits of using automatic tank gauging & environmental monitoring equipment. The TLS range of automated tank gauging and monitoring systems is designed to meet the needs of all commercial site operators.

Fuel Pumps & Adblue Dispensers

Cameron Forecourt offer a comprehensive range of commercial pumps suitable for use with gas oil, diesel, Adblue and petrol, most of which are available for delivery and installation ex-stock. Designed for purpose, our pumps are robust, heavy-duty and feature World Class proven technology.

Web Based Fuel Management Systems

Cameron Forecourt offers the widest and most advanced range of Fuel Management Systems available to the commercial vehicle refuelling market. Our systems offer GPRS on-line authorisation for each transaction and our web based reporting packages offer total control over fuel issues and prevent unauthorised use of the pump.

Environmental Surveys

Complying with the regulations and guidelines for the storage of fuel is a prerequisite to responsibly operating a commercial vehicle fuelling installation. Cameron Forecourt has all the qualifications, knowledge and expertise to assess the environmental risks on site, check your legal compliance and offer realistic advice on any actions or remedial work which may be necessary.

Installation & Project Management

Total responsibility ensures the optimum solution. The complexities and issues surrounding the design and installation of new equipment or systems for a busy commercial vehicle refuelling site are significant – and the ramifications if you get it wrong are extensive!

National Comprehensive Service Contracts & Ad-hoc Repairs

Cameron Forecourt has in excess of 30 trained and directly employed engineers strategically located throughout the UK. We are the largest provider of service and maintenance cover to commercial vehicle refuelling sites within the UK and are able to maintain not only our own equipment but also that manufactured by third parties. We are proud of our reputation as providers of prompt quality service and offer a simple and cost effective solution for all of your service and maintenance requirements - whatever the problem you can simply dial our number.
