

Lightweight (Composite Material) Safety Manway Cover & Frame

FS7A Pedal Assisted
Lifting Handle

FS7 Lifting Handle

Features

- Convenient replacement for heavy and difficult to lift cast iron manway lids, therefore minimising the risk of operator personal injury. Provides health & safety benefits with environmental protection measures
- Lightweight manway chamber lids manufactured from composite material to facilitate easy removal for product deliveries or tank dipping
- Convenient and easy to use “walking stick” or pedal assisted lifting handles
- 38 Tonne wheel loading (slow moving traffic only)
- Double sealed to prevent ingress of surface water
- Installation by our trained engineers

Lightweight (Composite Material) Safety Manway Covers & Frames

Specification

FL60

600mm x 600mm Square manway chamber cover and frame

FL76HD

760mm x 760mm Square manway chamber cover and frame

FL90/CD

900mm Diameter circular manway chamber cover and frame with central dip cap

FL100/CD

1000mm Diameter circular manway chamber cover and frame with central dip cap

FS7

"Walking Stick" lifting handle

FS7A

Pedal assisted lifted handle

Installation

Installed by Cameron Forecourt trained engineers. Finished product haunched with approximately 40mm of concrete to prevent ingress or collection of surface water. All areas affected by works made good with materials to match existing surfaces and waste material removed from site for disposal.

Complete System

Can be supplied and installed as a retrofit for traditional cast iron manway lids or as part of a complete system comprising sealed manway liners and pipework entry seals to provide a complete water free manway chamber to guarantee containment of spilled or leaked product.
