Below Ground Storage Tanks

Double skinned tanks to provide security and environmental protection

Construction

Constructed from certified carbon steel to meet all relevant industry standards. Suitable for storing petrol, diesel, gas oil etc.

Configuration & Sizes

Available in single or multi compartment configuration in sizes from 2000 litres to 80,000 litres capacity. Larger tanks available to special order

Continuous Leak Protection

Double skinned tank with the void between the two walls (interstitial space) being filled with an inhibiting fluid. The level of this fluid is constantly monitored, thereby causing an alarm to sound in the event of the inhibitor level falling

Leak detection may be operated in stand alone mode or interfaced to any suitable tank contents gauge or environmental monitoring system

Internal Pipework & Overfill Prevention

Supplied complete with factory fitted internal suction, vent and fill pipe connections including overfill prevention valves

Gauging & Alarms

All tanks are supplied as standard with a dip stick calibrated in litres . Optional gauges and alarm systems are available as extra

External Finish

Optional finish in a variety of oil and corrosion resistant treatments including black bituminous paint or polyurethane coatings.

Testing & Certification

Supplied complete with manufacturers certificates of test before despatch

Approvals (Petroleum Licensing Authority)

Prior to installation of a petrol tank it is a requirement that detailed drawings, risk assessments and method statements are submitted to the local petroleum licensing authority for approval. Cameron Forecourt have extensive experience in these procedures and can offer guidance and support throughout the entire planning and installation process.

Site Works

Excavations and associated works planned & scheduled by our technical department and executed by our directly employed trained installation engineers. All works to be in strict conformance with petroleum regulations or other appropriate legislation.

Delivery, Installation & Commissioning

Scheduled delivery using specialised transport and crane for installation by our own trained engineers

Warranty

Single point of contact, 12 months on-site parts and labour warranty by Cameron Forecourt engineers for tank and all associated equipment supplied as part of the overall package

Ongoing Maintenance

Single point of contact comprehensive contract or ad-hoc repairs carried out by Cameron Forecourt service engineers

Fuel Management Systems

A full range of Key/card/tag readers are available

Pumps

A full range of pumps are available

Other Services Available from Cameron Forecourt

- Above & Below Ground Fuel Tanks
- High Accuracy Tank Gauging & Environmental Monitoring Systems
- Fuel Pumps & Adblue Dispensers
- Comprehensive Service Contracts and
- Web Based Fuel Management Systems
- Site Surveys
- Installation & Project Management
- Nationwide Support
